

Overview

A robust J2EE architecture is critical to manage an organization's customers, partners, and employee relationships. Sierra Atlantic has over six years of in-depth experience of working with J2EE on cutting edge and time-critical projects. We constantly extend our expertise in the latest technologies, and help our customers achieve higher returns on their technology investments. In fact, our mature and stable practice ensures quality deliverables to our clients.

Our J2EE Expertise

Sierra Atlantic's dedicated J2EE practice provides flexible solutions that support contemporary changing business environments. Our specializations include architecture, design, integration, and implementation of enterprise applications using J2EE technologies.

We leverage our J2EE framework to build top-notch, state-of-the-art eBusiness solutions. Our global infrastructure and NShore™ methodologies allow us to provide cost-effective solutions, thereby reducing our customer's overheads. Sierra Atlantic's extensive expertise in areas such as WebLogic Application Server, WebSphere Application Server, JBoss, and Tomcat set us apart from other service providers.

Our record of servicing clients from across the globe in areas of portals and integration and extensions of servers is unmatched.

- Extended Team (ODC)
- Fixed Price

“ AltiusPAR partners with leading technology vendors to create total software and service solutions for the hospitality industry. Sierra Atlantic is a great partner because of its expertise in working with Oracle's On Demand service, as well as its deep knowledge in developing enterprise applications to meet the unique demands of all its end customers, including the hospitality industry. ”

Connie Rheams
Vice President
AltiusPAR

“ We had a very easy time adapting Sierra Atlantic's management processes with ours to create a hybrid model that proved to be very productive for both organizations. Communications were crisp from the very beginning and end users are already seeing the benefits of Sierra Atlantic's applications methodology in terms of high quality and timely deliverables. ”

Micheal Peters
Director of Information Technology
Network Appliance

Tools and Processes

At Sierra Atlantic, we rely on our first-hand experience, acquired while working on various complex projects. We incorporate leading best practices to provide the best possible solution to our clients, with a strong focus on early visibility, risk mitigation and absorbing change during an engagement. As a standard, we use development and management tools such as Integrated Development Environment, Code Formatting, and Version Control etc. to deliver stable and secure solutions.

We use the following development methodologies to build J2EE applications:

- Rational Unified Process (RUP)
- Phased Waterfall
- SCRUMM
