Received Laser and Optronics Top 10 Product Award for KTP Crystals and Fiber Optic Product News Top 10 Product Award for linearized external modulators.

Founded in 1967, Crystal Technology, Inc. is the world's leading supplier of lithium niobate. This oxide single crystal is essential for making surface acoustic wave (SAW) filters used in televisions, VCRs, DVD players, and communications devices based on cellular technology. Chances are there is a small piece of its crystal in your home. Crystal Technology also makes optical components that are used in a large variety of laser applications including: fiber optic communication, industrial lasers, medical lasers, photo processing, automated inspection, biosciences, space, and military applications.

Throughout its 40-plus years, Crystal Technology has prided itself in delivering the highest quality, best performing products available. Crystal Technology has the flexibility to offer highly customized designs as well

as large volume production. The entire manufacturing process is done in its Palo Alto facilities.

Its relatively small size (150 employees) and close-knit work environment have led to strong employee loyalty. It has a large percentage of employees with 10, 20, and even 30-plus years of service. Crystal Technology offers a generous package of benefits including a matched 401 (k) plan and a generous pension plan. The company also shares a portion of profits with the entire staff each year. In addition, there are many company sponsored events such as billiards and bowling tournaments, picnics in the park, a health fair, a blood drive, and flu shots. The small-company environment coupled with large-company benefits and a full activities calendar make for a dynamic and diverse workplace.

Ranked as the "Fourth Best Place to Work in the Bay Area" for 2008; Ranked the largest General Contractor in California by *California Construction* magazine (2008).

Webcor's success is based on its ability to attract smart, energetic, and creative people who love the challenge of building and who want to be part of leading-edge construction. CEO Andy Ball says his company is a great place to work for one main reason: respect. "The key to our success as an organization is that we value our people above all," Ball says.

Top graduates from leading engineering and construction management universities are drawn by Webcor's technological prowess, positive work environment, and the extensive opportunities for professional development. Recently, Webcor was ranked fourth among the Best Places to Work in the Bay Area (for companies with 501 to 1,500 employees) jointly by the *Silicon Valley/San Jose Business Journal* and *San Francisco Business Times*.

Webcor's culture of respect is augmented by a generous employee benefits program that helps the company attract and retain a first-class workforce. Aside from offering a health insurance

plan that the company pays for in full, the company also covers public transportation costs and provides hybrid cars for employees to use. Another benefit is a wellness program, which includes free, third-party counseling to help employees increase their fitness or cope with everyday stress. Other benefits include pre-tax flexible spending accounts, dental and vision insurance, a 401(k) plan, profit sharing plan, a 529 college savings plan, credit union membership, vacation, sick time, paid holidays, Webcor Wear clothing allowance, and a health club membership discount.

Communication and teamwork are important ingredients for life at Webcor, and employees are encouraged to engage company executives. Employees can even drop anonymous comments in an online suggestion box. Webcor's strong company culture and commitment to building high-quality structures are great sources of company pride, Ball explains. "It's great to drive past a building and say 'I built that,' " he says. "It's very satisfying."
